

## Extra Protection for LAN Cable

With the dedicated work of our R&D department, we have the following optional structure to provide the additional features of anti-rodent, water-proof, heat-resistant, and etc. for the general LAN cable

### SWB

Suitable for cables with the OD from 3 - 15 mm;  
Very flexible and easy to install;  
Horizontal wiring in a local area network

### SWA

Suitable for cables with the OD from 10-30 mm;  
Rodent-proof and for burial application;  
Protected against inductive influence;

### STA

Suitable for cables with the OD from 8-20 mm;  
Good flexibility and with small bending radius;  
Anti-rodent and Anti-pressure;  
Good shielding performance;

**At the same time, different jacket is also available for different applications.**

Jacket type	Feature	Application
PUR	Abrasion-resistant	Automation
LSZH	Low smoke and halogen-free	Indoor
XL-LSZH	High temperature (up to 150 °C)	Outdoor
Double layer	Two layers protection	Underground
